
Electromagnetic Spectrum Activity Answer Key

critical thinking activity: the electromagnetic spectrum - critical thinking activity: the electromagnetic spectrum there are many kinds of energy in the universe. the energy given off from the sun is radiant energy, scientifically called electromagnetic radiation. produced by nuclear reactions at the core of the sun, this energy streams from the surface of the sun in waves of different lengths. **activity 6 the electromagnetic spectrum and your community** - in this activity you will: • explain electromagnetic radiation and the electromagnetic spectrum in terms of wavelength, speed, and energy. • investigate the different instruments astronomers use to detect different wavelengths in the electromagnetic spectrum. • understand that the atoms of each of the chemical elements have a unique ... **unit 2 the electromagnetic spectrum - nasa** - and wavelength in the electromagnetic spectrum. teaching strategy because of the complex apparatus required to study some of the wavelengths of the electromagnetic spectrum and the danger of some of the radiation, only the visible light spectrum will be studied in the activities that follow. several different methods for **the electromagnetic classroom activities spectrum** - classroom activities this poster contains three classroom activities designed to introduce middle and high school students (grades 6-12) to different portions of the electromagnetic spectrum, including those used by origins missions. suggested science standards, vocabulary, and science background information are **online electromagnetic spectrum activity - abss.k12** - online electromagnetic spectrum activity name: ___pd: ___ directions: follow the links found in each of the activities listed below to complete the activities. **the electromagnetic spectrum - t e harrington middle school** - the order they fit into the electromagnetic spectrum all of these are "electromagnetic waves". this means that although they appear to be very different, in fact they're all made of the same kind of vibrations - but at different . all electromagnetic waves travel at the same speed - 300,000,000 metres per second, which is the speed of light. **waves & electromagnetic spectrum worksheet** - waves & electromagnetic spectrum worksheet directions: use the word bank to answer the following questions. each word will be used only once. crest frequency mechanical infrared trough transverse radio gamma wavelength longitudinal ultraviolet x-rays visible light amplitude electromagnetic
