
Electromagnetic Waves Answers Note Taking

chapter 12: electromagnetic waves - ecschools - •electromagnetic waves are produced when something vibrates an electric charge that moves back and forth. •when an electric charge vibrates, the electric field around it changes. 12.1 making electromagnetic waves what are electromagnetic waves? •because the electric charge is in motion, it also has a magnetic field around it. **the electromagnetic spectrum—answer key - uwyo** - the electromagnetic spectrum—answer key radio waves • longest wavelength lowest frequency • wavelength range: 106m to 1m • usually described by their frequency • different types of radio waves (from high f to low f are: radar, cb (citizen's band), fm, television, am, shortwave, satellite, communications **electromagnetic waves student worksheet answer the ...** - electromagnetic waves . student worksheet . answer the following questions during or after your study of electromagnetic waves. 1. what is "waving" in an electromagnetic wave? 2. how fast do radio waves travel in a vacuum? how fast does red light travel in a vacuum? how fast do x-rays travel in a vacuum? 3. **chapter 22: electromagnetic waves answers to questions** - chapter 22: electromagnetic waves answers to questions 1. if the direction of travel for the em wave is north and the electric field oscillates east-west, then the magnetic field must oscillate up and down. for an em wave, the direction of travel, the electric field, and the magnetic field must all be perpendicular to each other. 2. **waves & electromagnetic spectrum worksheet** - waves & electromagnetic spectrum worksheet directions: use the word bank to answer the following questions. each word will be used only once. crest frequency mechanical infrared trough transverse radio gamma wavelength longitudinal ultraviolet x-rays visible light amplitude electromagnetic **electromagnetic waves webquest answer key** - title: electromagnetic waves webquest answer key keywords: electromagnetic waves webquest answer key created date: 11/3/2014 8:30:06 pm **chapter 13: electromagnetic waves - lps** - from particle to particle,electromagnetic waves travel by trans-ferring energy between vibrating electric and magnetic fields. figure 1 water waves and sound waves require matter to move through. energy is transferred from one particle to the next as the wave trav-els through the matter. 390 chapter 13 electromagnetic waves **all about waves notes outline answers - teachengineering** - all about waves—notes outline answers a wave is a disturbance that carries energy from one place to another. matter is not carried with the wave! a wave can move through matter (a medium). if it must have a medium, it is called a mechanical wave. if it can travel without a medium (such as in space), it is called an electromagnetic wave. wave ... **the electromagnetic spectrum - echalk** - 22. electromagnetic waves can travel through a vacuum. true false 23. sound waves are part of the electromagnetic spectrum. true false 24. light waves, water waves, microwaves and the 'mexican wave' are all examples of ____ waves. electromagnetic transverse longitudinal (answers) the electromagnetic spectrum **chapter 18 the electromagnetic spectrum and light section ...** - section 18.2 the electromagnetic spectrum (pages 539-545) this section identifies the waves in the electromagnetic spectrum and describes their uses. reading strategy (page 539) summarizing complete the table for the electromagnetic spectrum. list at least two uses for each kind of wave. **the electromagnetic spectrum - lee.k12** - light waves carry both electric and magnetic energy. gamma, x-rays, ultraviolet (uv), visible, infrared, microwaves, and radio waves are all the forms of em. this is called the electromagnetic spectrum. 5 the longer the wavelength, the less energy the em carries. visible light is just a very small portion of electromagnetic energy. **electromagnetic spectrum quiz - brainpop** - electromagnetic spectrum quiz 1. how are different types of radiation arranged along the electromagnetic spectrum? a. by how fast they travel b. by their sources c. by the amount of energy they carry d. by how radioactive they are 2. what is the difference between a wave and a particle? a. a particle is a discrete unit of energy; a wave is a **questions and answers about biological effects and ...** - questions and answers about biological effects and potential hazards of radiofrequency electromagnetic fields oet bulletin 56 fourth edition august 1999. questions and answers about biological effects and potential hazards of radiofrequency electromagnetic fields ... electromagnetic waves have frequencies in the range of about 3 kilohertz to ... **8th grade science waves unit information - troupe.k12** - 8th grade science waves unit information milestones domain/weight: 40% energy and its transformation content map: waves content map ... electromagnetic and mechanical waves solid s8p4d. describe how the behavior of waves is affected by medium (such as air, water, solids) and/or acce 3. how are sound **name: section: electromagnetic spectrum & light - webquest ...** - 4. what is the order of the electromagnetic spectrum from highest to lowest energy? use the visual below to answer question 5. (a) longer wavelength; (b) shorter wavelength 5. which has more energy, a or b? explain your reasoning. 6. define a wavelength. 7. what is a frequency of a wavelength? 8. for visible light (roygbiv), which has the ...
