
Electron Spectrum Gapless Semiconductors Springer Series

electron spectrum of gapless semiconductors - gbv - electron spectrum of gapless semiconductors with 58 figures and 5 tables springer . contents 1. introduction 1 2. band-structure calculation methods 3 2.1 adiabatic approximation 3 2.2 the one-electron hartree-fock approximation 7 2.2.1 the hartree approximation 7 2.2.2 the hartree-fock method 8 2.2.3 discrete distribution 13 **82 springer series in solid-state sciences** - 116 electron spectrum of gapless semiconductors by j. m. tsidilkovski 117 electronic properties of fullerenes editors: h. kuzmany, j. fink, m. mehring, and s. roth 118 correlation effects in low-dimensional electron systems editors: a. okiji and n. kawakami 119 spectroscopy of mott insulators and correlated metals **arxiv:1705.01638v1 [cond-mats-hall] 3 may 2017** - for weyl semimetals with topologically protected gapless electron spectrum. in weyl semimetals $k = 1$ is given by the quantized monopole charge of the berry curvature u_x and eq. (4) describes the chiral anomaly. the above consideration shows that both generation of helicity im-balance due to acceleration of electrons by the electric eld ... **proposal for a new class of materials: spin gapless ...** - proposal for a new class of materials: spin gapless semiconductors abstract the concept of the spin gapless semiconductor in which both electron and hole can be fully spin polarized is proposed, and its possibility is presented on the basis of first-principles electronic structure calculations. **electron states and quasienergy spectrum of the graphene ...** - electron states and quasienergy spectrum of the...Ж. НАНО-ЭЛЕКТРОН. ФІЗ.5, 03005 (2013) 03005-3 cases n^2 decreases as (22) 0 n qww [29, 30]e con-dition (14) can be rewritten as the next inequality 22 pp pp ee
